	160 TC_ ✔	MAPPING I_ ✔	MAPPING 2_
[HAMS ASSISTING ON NEIGHBORHOOD NETS NOT LISTED UNLESS REPORTED INTO HAM NET- INFO. NOT AVAIL TO HAM NETS]	CAL FIRE MON_ ✔	TRIANGUL 1_	

**NOTE: Ham Nets Coordinate all Neighborhoods and perform the mapping which aggregates all Neighborhood Reports to achieve overall situational awareness for all of Shingletown, in addition to triangulation for smoke, fires, etc… and preparing and transmitting the overall report summary and recommendations, etc…).

COMMENTS:
We were very short staffed this evening. Only 1 Ham ran the entre Ham Net Operations. The Ham Net Operations involves, inter-alia, operating on 3 or more frequencies during the Nets while concurrently performing Net Operations, recording input, summarizing, mapping, etc… . The SER system has time schedules for various operations to facilitate coordination of various operations which are all being run concurrently.

We need more Hams to help out.

In the event of an emergency, without sufficient Ham Operators, SER will have to use non hams for Emergency Communications duties (e.g., Fire Nets) in accordance with SER Policy and published FCC rules. All operators need to follow SER Procedures so that you can help out when needed.
