

SHINGLETOWN EMERGENCY RADIO PLAN - DRILL NET REPORT.

DATE: **03/18/2021**

TIME: 1900 HOURS

Report prepared by: K6PDS

Type of Net:	Practice Drill Net <input checked="" type="checkbox"/>	
Freq – HAM	Prim Net on: 760 <input checked="" type="checkbox"/> 505 <input type="checkbox"/> w/relay <input type="checkbox"/> w/o relay <input type="checkbox"/>	Parallel Net on: 505 <input checked="" type="checkbox"/> 760 Relay <input type="checkbox"/> 760 Silent <input type="checkbox"/> w/relay <input type="checkbox"/> [silent monitoring to conserve Battery (e.g., bad weather)] w/o relay <input checked="" type="checkbox"/>
HAM TONE TYPE:	Prim Freq. Tone Announce – non emerg. <input checked="" type="checkbox"/>	Parallel Freq. Tone Announce-non emerg. <input checked="" type="checkbox"/>
Freq. NON HAM	Each Area / Neighborhoods: CH 1 TONE ANNOUNCE – NON EMERG <input checked="" type="checkbox"/>	
Activations:	Full-all areas <input checked="" type="checkbox"/>	QXA (Sitrep) <input checked="" type="checkbox"/>
	Partial:	QWA PROCEDURE: REQUESTED <input type="checkbox"/> NOT REQUIRED <input checked="" type="checkbox"/>
AREA SPECIFIC ADDITIONAL MATTERS:	N/A	
Divisions Reporting	3	
Areas Reporting	4	
Station Reports	30	
TOTAL TIME FOR ALL HAM, AND NON HAM NEIGHBORHOOD NETS:	18 MINUTES	THIS IS THE TOTAL TIME (STARTING FROM HAM NCS ACTIVATION / TONE OUT) IN WHICH Ham Nets and all Area / Neighborhood Nets were Activated and through the end when all nets were completed. Such includes: information gathering at each Neighborhood level, report taking at each Area Neighborhood level, Relay of the Area reports into the Ham Nets, summarization and mapping, etc... of all Area station reports, together with Net Control recommendations, and with the summary report transmitted for all stations to copy and to report back into their own Area / Neighborhoods on each Areas Ch 1 (Non Ham Freq) following the Ham Nets. See Note Below **.
TATICALS ACTIVATED: [ITEMS ARE MARKED WITH <input checked="" type="checkbox"/>]	Prim: NCS 760 <input checked="" type="checkbox"/> NCS 505 <input type="checkbox"/> RELAY EAST <input type="checkbox"/> RELAY WEST <input type="checkbox"/>	
Hams Stns Helping on Ham Nets (PRIM & PARALLEL): K6PDS KQ6CS. <small>[HAMS ASSISTING ON NEIGHBORHOOD NETS NOT LISTED UNLESS REPORTED INTO HAM NET- INFO. NOT AVAIL TO HAM NETS]</small>	Parallel: 505 RELAY <input checked="" type="checkbox"/> 760 RELAY <input type="checkbox"/> 760 Silent Monitor <input type="checkbox"/> RELAY EAST <input type="checkbox"/> RELAY WEST <input type="checkbox"/>	
	160 TC <input checked="" type="checkbox"/>	MAPPING 1 <input checked="" type="checkbox"/>
	CAL FIRE MON <input checked="" type="checkbox"/>	TRIANGUL 1 <input type="checkbox"/>
**NOTE: Ham Nets Coordinate all Neighborhoods and perform the mapping which aggregates all Neighborhood Reports to achieve overall situational awareness for all of Shingletown, in addition to triangulation for smoke, fires, etc... and preparing and transmitting the overall report summary and recommendations, etc...).		
COMMENTS: We were very short staffed this evening. Only 2 Hams ran the entire Ham Net Operations. This involves, inter-alia, operating on 3 or more frequencies during the Nets while concurrently performing Net Operations, recording input, summarizing, mapping, etc... . The SER system has time schedules for various operations to facilitate coordination of various operations which are all being run concurrently. We need more Hams to help out. In the event of an emergency, without sufficient Ham Operators, SER will have to use non hams for Emergency Communications duties (e.g., Fire Nets) in accordance with SER Policy and published FCC rules. All operators need to follow SER Procedures so that you can help out when needed.
