

12/02/2021 SHINGLETOWN EMERGENCY RADIO

Practice Net 760 Repeater:

Our Practice Net Agenda was for situation reports (actual and Drill) including determining Neighborhood needs and conditions due to having (DRILL): no electricity, no telephone land lines, no cell phone, no internet, no 911 services; earthquake with magnitudes; together with certain areas in need of drinking water. All of this was done while we simultaneously conducted an Active Fire Net due to an actual Fire with explosions (Fern Incident) that was toned out by Cal Fire during our Net. In addition to the Fire Net, we processed (Actual and Drill) 90 individual station reports covering 15 neighborhoods. Our net (Situation Reports and Fire Net) was completed in approximately 60 minutes

FIRE NET - (FERN INCIDENT) - Fern Road East – grow houses – two large outbuildings on fire. Multiple explosions, ... The SER net activated Fire Net procedures during Situation Report Net. Such Fire Net took a large amount of the Net Time. The Fire Net was deactivated after reports as to the Fires Location, and after monitoring TAC 11, monitoring Round Mountain camera, estimating fire location and mapping (fire north of the Shingletown Core), and concluding no present risk to Shingletown Core Area. During this Net, including the Fire Net, all situation reports were taken, Neighborhood conditions and needs (drinking water) reported and mapped. This was a very busy net.
